Dear student,

Thank you for helping us with the setup of this installation!
You are crucial during this event to ensure everything runs smoothly.
Your assistance is essential.

Below you will find your guide for the day. Please read it carefully. A colleague from Arttenders will also provide you with additional information about the specific tasks you will have.

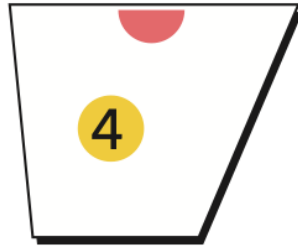

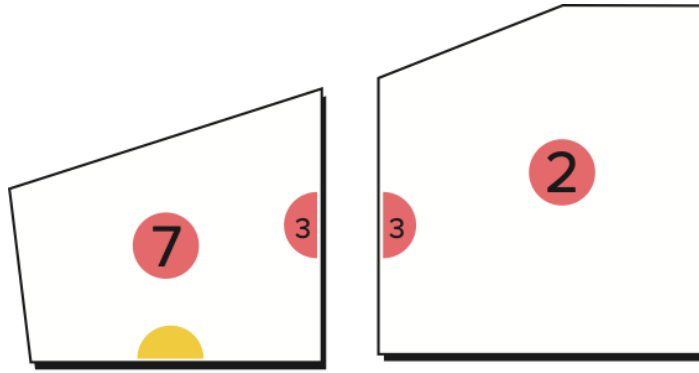

- 1)** There will be approximately 100 participants attending this workshop. Each participant will receive a color-coded panel, which will be distributed by the host. There are a total of 10 different colors, and each color has a corresponding dot on the floor.
> *Your role is to be positioned on one of these colored dots on the floor to receive participants with the correct color.*
- 2)** Approximately 10 participants will gather around each colored dot on the floor, each holding a panel.
> *Your task is to verify if their panel matches the color dot on the floor.*
- 3)** One of the panels contains instructions for the group. They need to read and follow these instructions, which consist of questions related to a specific persona and connecting their panels using the provided numbers.
> *Your responsibility is to ensure that participants correctly connect their panels. Afterwards, you can neatly join them together using blue tape. Also, pay attention to whether participants notice the instructions and remind them if necessary.*
- 4)** Each group will have created a different building component. All the building components will then come together to form one large-scale structure.
> *You and your team members will assemble all the parts according to the designated color dots on the panels. The Arttenders representative will assist you in determining the sequence of the building components.*

Please note:

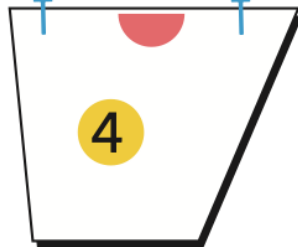

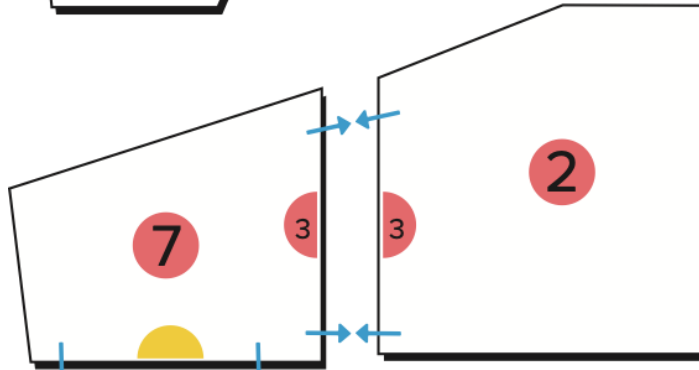

- It looks better if you tape the panels together tightly and neatly.
- If you have any questions or uncertainties, you can always approach someone from Arttenders.
- Confidentiality: Do not disclose what we are building.
